

Research on the Scholarship of Teaching & Learning

Gain a greater sense of confidence in conducting research focused on the scholarship of teaching & learning

January 2 - 4, 2019 Georgia Gwinnet College, Lawrenceville, GA

Faculty members throughout higher education are being asked to become better researchers and scholars of their own practices—whether it be in disciplinary context, teaching, or other areas of (faculty) performance. Since scholarly effort is a component of most faculty members' tenure, promotion, and merit systems, it is important that individuals receive credit for additional research that is not published in discipline journals. In response to these increasing research demands, this event focuses on helping faculty members further develop their scholarly efforts, as it pertains to their role as an educator.

Participant Benefits:

1 Improve your ability to use assessment data and other information as the basis for publishable research.

2 Strengthen your ability to conduct scholarship in various contexts, including outside your own discipline.

3 Work to develop a network of educators committed to advancing knowledge related to the scholarship of teaching & learning.

Facilitators:

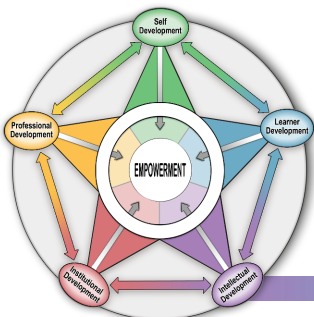

The facilitation team consists of Dr. Daniel K. Apple (Pacific Crest), Dr. Steven Beyerlein (University of Idaho), and Dr. David Leasure (Higher Education Consultant)

Registration:

To register, please visit: <https://fs20.formsite.com/pacificcrest/L2L/index.html>
